REDROCK

Red Rock offers engineering, fabrication, construction, and maintenance services.

Capability Statement

ABOUT

Red Rock is a multi-disciplinary service provider delivering integrated engineering, construction, maintenance, and workforce solutions across Australia. Operating from strategic bases in the Pilbara and Perth, we combine technical capability, industry experience, and a deep commitment to safety and innovation.

Our team supports clients throughout every stage of a project, providing efficient, reliable and value-driven outcomes across diverse sectors.

SERVICES

ENGINEERING & FABRICATION

Red Rock operates fully equipped fabrication workshops in both the Pilbara and Perth, enabling us to deliver high-quality steel fabrication, modular construction and engineered solutions with fast turnaround times.

Our engineering team provides design, drafting and technical support to ensure every project is constructed to specification and delivered efficiently.

We specialise in structural assemblies, custom steelwork, heavy-plate fabrication, repairs, welding services and onsite installation.

This integrated capability allows us to support everything from small repairs to large-scale, complex engineered projects.

STRUCTURAL, MECHANICAL, PIPING

Our Structural, Mechanical and Piping division delivers comprehensive structural, mechanical and piping services across both greenfield and brownfield environments.

We manage the installation of structural steel, mechanical equipment, and associated pipework from fabrication through to commissioning.

Our teams are experienced in mechanical alignment, equipment replacement, pipe spool installation, hydrostatic testing, shutdown support and multi-discipline project coordination.

Red Rock ensures every structural, mechanical and piping package is executed safely, efficiently and with minimal operational disruption.

FACILITIES MAINTENANCE

We deliver multi-disciplinary facilities maintenance services that support the safe and reliable operation of commercial buildings, mine sites, industrial facilities, camps and remote buildings.

Our services cover HVAC repairs and installation, plumbing and gas works, electrical maintenance, carpentry, building repairs and general trade services.

Red Rock also specialises in the installation, commissioning and decommissioning of transportable buildings, providing clients with a seamless service from mobilisation through to final handover.

Our focus is on maintaining asset functionality, minimising disruptions and ensuring ongoing compliance.

SOLAR POWERED CRIBS, OFFICES, ABLUTIONS & GENERATORS

As a leader in sustainable site infrastructure, Red Rock designs and manufactures fully solar-powered, cyclone rated, transportable buildings, offices, crib-rooms and ablutions, that perform reliably in remote and high-temperature conditions.

Our product range includes 7.0kW and 3.52kW Solar Powered Cool Crib Offices and 3.52kW Solar Powered Ablution Blocks, each engineered to eliminate the need for diesel generators while significantly reducing emissions and operating costs.

These units offer quiet, clean and energy-efficient solutions for worksites seeking environmentally responsible infrastructure.

With a reputation as the Australia's first solar powered transportable building manufacturer, we ensure rapid, safe and compliant deployment of transportable units across the region.

Solar-powered generators and hybrid wind–solar energy cubes harness natural elements to electrify operations and spaces historically dependent on diesel. Delivering comparable power output with a dramatically lower carbon footprint, our green energy solutions significantly reduce both emissions and the cost of powering remote and off-grid operations.

ROOFING & CLADDING

Red Rock Roofing and Cladding services include the supply and installation of roof sheeting, wall cladding, insulation, flashings, roof drainage, louvres, and roof vents, as well as edge protection, scaffolding, and roof safety systems for both new construction and replacement works. Operating across rural, remote, and regional locations, our team has successfully installed over 70,000 m² of roofing and wall cladding on a variety of industrial and commercial facilities.

With more than five years of experience in the construction industry, we provide expert advice on material selection and construction methods to ensure the most suitable solutions for each project and environment.

Our skilled workforce is trained to operate elevated work platforms and mechanical lifting equipment, including panel lifters, knuckle booms, and scissor lifts. All work is self-performed by our qualified team, ensuring quality and consistency.

Red Rock is committed to strict safety standards, enabling us to safely deliver projects on both greenfield and brownfield sites, including areas adjacent to operational facilities and occupied buildings. Roof Sheeting Services

SCAFFOLDING

We deliver end-to-end scaffolding and access solutions designed to meet the needs of complex projects and operational environments.

Our services include the full supply, installation and dismantling of scaffolding systems, along with material only hire options, where required.

Red Rock provides detailed scaffold design, engineering and planning to ensure safe and efficient access for construction, maintenance, shutdowns and high-risk environments.

Our experienced teams manage a wide range of access solutions—from confined spaces to large-scale structures. Ensuring safety, compliance and productivity.

ABRASIVE BLASTING & PROTECTIVE COATINGS

Red Rock offers comprehensive abrasive blasting and protective coatings services to extend asset life and maintain structural integrity in harsh environments.

We provide surface preparation, industrial blasting, coating application and corrosion protection services and lead removal to meet a variety of industry standards and client specifications

With workshop, mobile and onsite capabilities, we can complete in our workshop or directly at our clients site to reduce downtime and improve efficiency.

As an authorised distributor for Intercept Australia and UnderRaps™ solutions, we provide reliable products and services to encapsulate scaffolding enclosures to mitigate dust from abrasive blasting and Lead removal and also protect your assets during storage, transport and handling.

ENCAPSULATION

Red Rock uses high-quality protective wraps, covers and materials designed to prevent corrosion, weather damage and general wear while equipment is stored or moved. This includes custom-fitted shrink-wrapping, durable PVC and fabric covers, and long-term preservation options suitable for indoor and outdoor environments.

Our team has hands-on experience in encapsulation, preservation wrapping, anti-corrosion methods and secure transport solutions. No matter the size or shape of your equipment, we ensure it is safely covered, protected and ready for transport or long-term storage.

Red Rock is an authorised distributor for Intercept Australia and UnderRaps™ solutions.

LABOUR HIRE

Red Rock provides a reliable and skilled workforce to support ongoing operations, shutdowns and project delivery.

Our labour hire services cover trades, technical personnel, general labour and specialist roles, with options for FIFO, DIDO or local placements.

We supply both short-term and long-term workforce solutions, ensuring clients receive the right people, with the right capabilities, at the right time.

Our workforce is known for its strong safety culture, adaptability and commitment to delivering high standards on every job.

PROPERTY DEVELOPMENT

Red Rock provides property development support through a combination of construction management, civil preparation and contractor coordination.

Our experience includes modular housing installation, site preparation, and end-to-end project oversight.

We take a quality-focused approach, ensuring efficient delivery, strong communication and the consistent achievement of client expectations and statutory requirements.

Red Rock has extensive experience and expertise in Australian government and community housing development. We offer comprehensive solutions tailored to meet the unique needs of these sectors, including project management, stakeholder engagement, regulatory compliance, and innovative design.

Our track record demonstrates a strong commitment to delivering high-quality, sustainable housing outcomes that benefit communities and support government objectives.

HSEQ

At Red Rock, the safety of our people, the protection of the environment and the delivery of high-quality work are central to how we operate.

We are committed to providing a safe and healthy workplace where every person is supported to work responsibly and return home safely each day. Strong leadership, clear procedures and continual improvement ensure safety is embedded in every task and decision.

Red Rock recognises its responsibility to minimise environmental impact. We apply practical, sustainable work practices that address climate change, resource efficiency, waste reduction and environmental protection. Environmental risks are actively assessed to ensure our operations protect the surroundings in which we work.

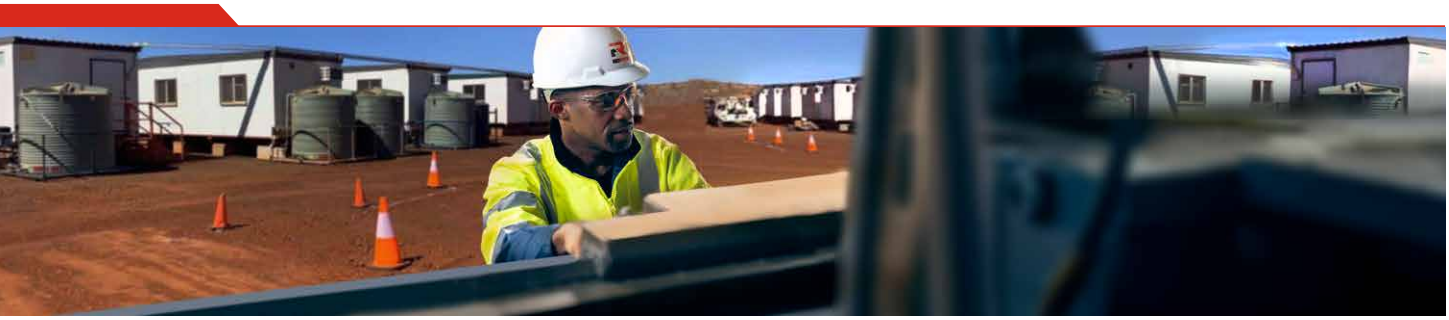

Quality underpins our service delivery. Disciplined processes, skilled personnel and consistent standards ensure every project is delivered reliably and to a high level of craftsmanship, from planning and fabrication through to installation, commissioning and maintenance.

Red Rock is accredited under the Australian Government Building and Construction WHS Accreditation Scheme, reflecting our commitment to the highest industry safety standards through a rigorous, independent audit process. As an accredited head contractor, we are fully pre-qualified for major Commonwealth-funded projects, reinforcing a strong culture of safety and excellence for our clients and workforce.

We also hold ISO certifications across safety, environmental management and quality—ISO 45001, ISO 14001 and ISO 9001—demonstrating our adherence to internationally recognised standards.

INDIGENOUS ENGAGEMENT

Red Rock Services is a majority Indigenous-owned Supply Nation certified business, and our commitment to meaningful Indigenous participation is embedded in every aspect of how we operate.

We recognise the important role that business plays in creating opportunities that support long-term social and economic empowerment for Indigenous people, families and communities. As an organisation founded on strong cultural values, we actively work to increase representation, capability and involvement across our workforce, supply chain and community partnerships.

Our approach to Indigenous engagement focuses on providing real, sustainable pathways for employment, training and career development. Red Rock is dedicated to creating opportunities for Indigenous Australians to enter the workforce, gain new skills and progress into leadership roles. We invest in structured onboarding, mentoring, on-the-job training and upskilling initiatives that support career growth and help develop the next generation of Indigenous leaders in our industry.

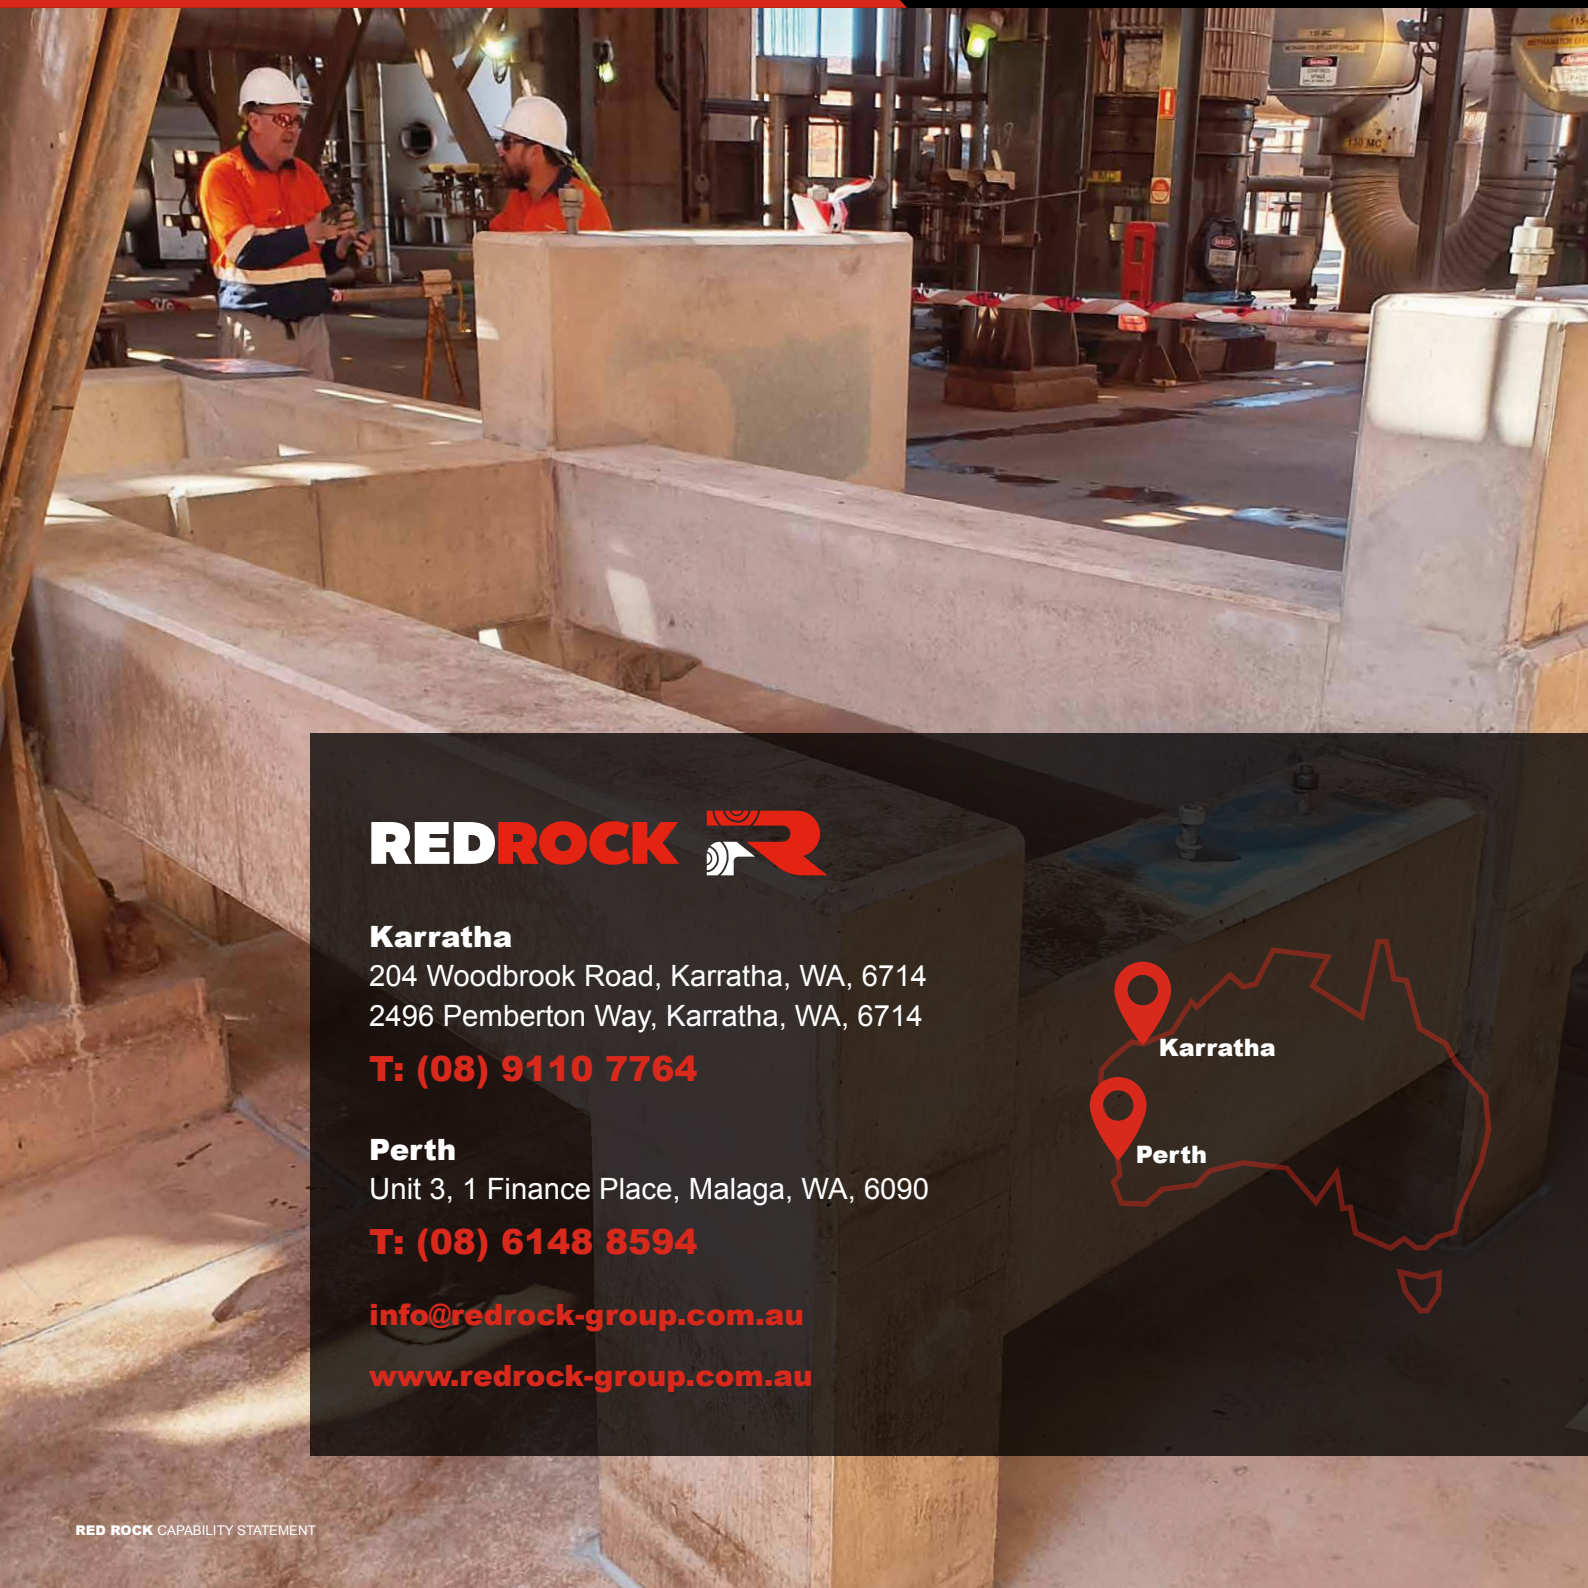

We also understand the importance of strengthening Indigenous-owned businesses. Red Rock is committed to procuring goods and services from other Indigenous businesses, ensuring that a meaningful portion of our supply chain spend supports the growth of Aboriginal and Torres Strait Islander organisations. By working collaboratively with these suppliers, we help expand local capability, drive economic participation and contribute to the broader development of Indigenous businesses across Western Australia.

Beyond our operational commitments, Red Rock actively participates in and supports community initiatives that promote cultural connection, wellbeing and local development.

We engage with community groups, traditional owners and local stakeholders to ensure our activities are respectful, inclusive and aligned with community aspirations. Whether through sponsorships, participation in cultural events, or supporting programs that benefit youth, families and elders, we strive to add value in a way that reflects our heritage and our responsibilities as an Indigenous-owned organisation.

Our Indigenous engagement strategy guides our actions and reinforces our long-term commitment to creating positive and measurable outcomes. At Red Rock, Indigenous involvement is not a compliance requirement—it is a core part of who we are, how we operate, and the legacy we aim to leave within the communities we proudly serve.
